About Interra Health:

Interra Health is a Wisconsin based C-Corp founded in 2001 by Derek Boyce and Ryan Sommers. From its headquarters near Milwaukee, Wisconsin, Interra Health provides comprehensive wellness and health management programs to the small-to-medium sized business market as well as to city and county government entities nationwide. In addition, Interra Health has developed a compatible line of business through which it plans, designs, implements, staffs and manages onsite health clinics at an employer's location.

By combining highly trained medical professionals with specialized, innovative technology, Interra Health has developed customizable wellness and clinic program options designed to improve the health of any company or agency, regardless of size. Each service is continually improved and expanded to meet client needs.

As a leader in the wellness field, Interra Health is dedicated to placing control over healthcare where it belongs – in the hands of the people it serves. Their focus is on action, not reaction. Through the creation of custom tailored, cost-effective programs, Interra Health empowers employees and their families to make lifestyle changes that improve their personal health and well-being, as well as the fiscal health of the companies it serves.
