Aurora Health Care, a not-for-profit Wisconsin integrated health care provider, was created around a single idea: There is a better way to provide health care.

- A better way for people to get the care they need in settings that are convenient and comfortable
- A better way for families to receive the services and support they need to lead healthier lives
- A better way for physicians to offer the latest technology and treatment options to their patients
- A better way for talented people working in health care to fulfill their professional callings
- A better, more cost-effective way for employers to provide for the health care of their employees
- A better way to build healthy communities

Established in 1984, Aurora has become a nationally recognized leader in efforts to improve the quality of health care. Aurora has sites in more than 90 communities throughout eastern Wisconsin, including 13 hospitals, more than 100 clinics and over 130 community pharmacies. More than 3,400 physicians are affiliated with Aurora Health Care, including more than 700 who make up Aurora Medical Group.

Part of our mission is to promote health, so we offer a comprehensive wellness program to keep people healthy. Wellness is a state of being which is different for each individual. Wellness is achieved as each person reaches a healthy balance of a combination of things, including ones physical, emotional, spiritual, vocational, intellectual, social and environmental health.
